

Examinee Instructions

2 min.
Examinee
Instructions

This is a sample of Examinee Instructions which will be available outside and inside each OSCE station.

Task and timing details

Examinees can use their notebooks to take down case information

Reminder to verbalize your interaction

Note: This station requires a physical assessment. Remember to verbalize all intended actions to the examiner.

Station 1

Instructions to Examinee

65-year-old Bonnie fell at home yesterday.

She is now complaining of left arm pain.

You will have **seven (7) minutes** to:

- Obtain a history of the pain
- Complete a focused physical assessment of the arm
- Respond appropriately to the assessment findings

1. An x-ray report is available for review
2. An image of the arm is available for review

PLEASE NOTE:

As you proceed with the physical assessment, **EXPLAIN TO THE EXAMINER** what you would do and **DESCRIBE ANY FINDINGS.**

- At the **seven (7) minute** mark, you will have **four (4) minutes to answer the examiner's questions** related to the scenario.
- You have **eleven (11) minutes** for this station.
